## TRS Video stylet

An effective tool for difficult airway intubation

UE Video stylet provides a fast solution for routine, difficult, and emergent airway intubation in the areas of anesthesiology, ICU, ER, etc.

### Designed by experts

This product is the result of years of clinical research, design, and verification by experienced anesthesiologists and experts to provide a quick, effective solution for airway management.

### Compatible monitor

The monitor can be connected with the blades of UE video laryngoscopes (VL and TDC series).

### Convenient disinfection

The product consists of a monitor and a rigid stylet. The rigid stylet can be sterilized by submerging (except high temperature and pressure).

◊ High-resolution and true-color image

◊ Press the key to take and store photos/videos

◊ Ergonomic short handle

One-hand operation  
a single person is sufficient for airway management

◊ Oxygen connector

Connects to ET tubes  
at the same time: ventilate & operate

◊ S-curve

For a small mouth opening & restricted neck position
